- Save time and money!
- Wide range of fabrics and sizes
- Able to customise to any size, colour or add extra eyelets
- Same day delivery*
- Our stock sizes range from 1.8m x 2.4m up to 25.0m x 60m, so if you cannot find your required size in the table, please ask!

PE Tarps vs PVC Tarps

Which tarp is most suitable for a project is determined by the preference of the builder, budget, weather exposure, size of the project and the likeliness of the builder requiring the tarp for future jobs. We stock several grades of fabric that vary in weight & durability. When deciding which tarp is right for your project some of the main benefits for each fabric type are –

PE Tarps

- Affordable and economical
- Available in larger sizes
- Less labour securing because of larger stock sizes
- Easy to fold, manoeuvre and handle
- Can be used for covering timber or lining sand/soil when not required for the roof

PVC Tarps

- Extremely durable
- Will hug the roof and are less prone to flapping
- Easily repaired
- Custom branding available
